## SUMMARY

---

I am a penultimate-year CS and maths student seeking internships in software engineering and cloud computing. I am currently contributing to a cybersecurity club, working with other students redesign our website. Beyond coursework, I enjoy working as a tutor, and also developing my knowledge in AWS cloud solutions.

## TECHNICAL EXPERIENCE

---

### IT Officer

Jan 2025 – Present

*MISC (University of Melbourne Information Security Club)*

- Collaborating on revamping the club website using React to enhance usability, accessibility, and performance.
- Contributing to developing features such as interactive event listings and sponsor showcases to enhance visual appeal.
- Managing version control and team collaboration using Git and Jira to streamline development.
- Participating in weekly meetings to discuss frontend, backend, and DevOps development to ensure smooth progress and alignment with long term project plans.

## WORK EXPERIENCE

---

### Academic Tutor

Jun 2024 – Present

*Qs School, Essendon*

*James An College, Mitcham*

- Tutoring six weekly classes including selective entry, for groups of up to 10 students.
- Tailoring teaching strategies to different learning styles, ensuring all students feel comfortable and engaged while accelerating their comprehension and academic progress.

### Team Member
